

# I cant see it

## I cant see it

We get a webpage that immediatly redirects to youtube's infamous Rick Astley video and disappears from our Network log. We can tell chrome to preserve the log and find out what this site has to offer for us:

Now when we check the cookies, we discover this:

```
{ "request": "Q0IUe24wV195b3VfQ0BuX3M1NV9tZX0=" }
```

We can decode this with base64 and we get the FLAG!
